Hot Issues:

# Non-Responsive

**Navy/Northrop Grumman, Bethpage, NY:** On February 4<sup>h</sup>, LRPB attended Northrop Grumman's (NG) virtual public meeting with the local community regarding the status of its plans to install three extraction wells, approximately 10,600 feet of underground piping, and a treatment system to treat contaminated groundwater off-site of the former NG facility. Thirty-one people attended this meeting, including representatives of NG, NYSDEC, the Town of Oyster Bay, Congressman Suozzi's office, the Nassau County Legislature, and private citizens. At the meeting, NG provided an update on the excavation work that is being planned in the neighboring streets, and its procedures for communication with homeowners about its scheduled work. The proposed plans are subject to review and approval at a Town Board meeting, scheduled for February 9.
